The whole web at a glance structured in data-rich detail

Search Engine | Traffic | KYC | Dashboards

At Dataprovider.com, we index the web and structure the data.

The online world might seem abstract and endless, but our expertise is ordering the chaos. In our database, you'll find structured web information about over 800 million domains and 3.1 billion webpages, with a filterable index and 200+ data fields.

Based in the Netherlands, Dataprovider.com is global tech company with European roots. Since 2012, we've been **structuring web data** and **generating insights** for top organizations across the globe. From business information and asset management to brand protection, public research, and national statistics offices, we help organizations make sense of the online world.

We pride ourselves on **ethical** and **high-quality** operations, made possible by our proprietary data, gathered and structured with our own software.

Our web data unveils a hidden world, giving you **real-time data**, tools, and insights to stay ahead of the curve.

Curious to know what we can do for your industry?
